Voluntary Statewide Coordination in Public Higher Education, by M. M. Chambers. Ann Arbor, Mich., University of Michigan, 1961. 83 p.

Largely from the experience and practices of five States, Dr. Chambers concludes that there is a clear tendency away from direct control of State-supported colleges and universities by noneducational State governmental agencies. He asserts that there is a definite trend toward a greater amount of voluntary coordination of State-supported higher institutions as opposed to coordination required by legislative or gubernatorial directives.

The five States discussed most fully in the monograph are California, Colorado, Indiana, Ohio, and Michigan. Minnesota, Missouri, Washington, and Arkansas are mentioned more briefly.

Although Dr. Chambers says that the California "Master Plan of 1960" was developed "in response to the 1959 legislative request . . ." and that the recommendations inherent in the Master Plan were made official when "the legislature of 1960 accepted the general outline of this plan . . ." and that "a 1960 statute also created a new Coordinating Council for Higher Education, effective July 1, 1961, to consist of 15 members . . ." he, nevertheless, classifies California among the States operating under "voluntary coordination." He points out, too, that Indiana, also classified as a State in which institutions are cooperating voluntarily, had in the 1949 session of the legislature a "rider" attached to the biennial appropriation act requiring and spelling out joint reporting procedures of the four State-supported higher institutions.
